

GONZALO GIMENEZ

Buenos Aires, Argentina · gonzalodangimenez@gmail.com · (+54) 11-3430-7458 · linkedin.com/in/gonzalo-gimenez- · Portfolio: <https://portfolio-gonzalo-gimenezs-projects.vercel.app/>

PROFESSIONAL PROFILE

Software developer with a technical background and a focus on backend, frontend, data, automation, and artificial intelligence. Experience with Python, Node.js, TypeScript, REST APIs, SQL databases, and services.

Oriented toward AI Engineering, with hands-on experience integrating LLMs, automating workflows, and building AI-based solutions, plus knowledge of agents, APIs, MCP, and Engram. Interested in applying artificial intelligence to real processes, combining software engineering, data, and automation for clients.

I am a self-directed learner, adaptable, and constantly interested in picking up new technologies and solving problems in a practical way.

EXPERIENCE

- AI Engineer / Software Developer | Habitium (Madrid, Spain)

11 / 2025 – 08 / 2026

 - Backend and frontend services and applications with Python, FastAPI, Node.js, NestJS, TypeScript, and Next.js, focused on process management and automation.
 - Design and integration of REST APIs and third-party services to connect applications and features.
 - Automations aimed at optimizing day-to-day tasks and work processes.
 - Integration of AI tools and LLMs into work workflows.
 - Database design and SQL query development.
- Full Stack & Data Developer | Lunexa-IT

03 / 2024 – 10 / 2025

 - Web applications and solutions for managing, processing, and organizing data across different processes and needs.
 - Development and integration of REST APIs and backend/frontend services with Node.js, TypeScript, NestJS, Angular, and Next.js, connecting apps to databases and external services.
 - Relational database design and management with PostgreSQL, plus automations to optimize processes.
 - Solutions for data processing and analysis using Python.
- Technology and Administrative Assistant | Última Milla / Telecom

11 / 2020 – 07 / 2023

 - Data analysis and processing to support decisions, organize information, and improve administrative and operational processes.
 - Automation and report generation in Excel, optimizing how information is processed and presented.
 - Management, updates, and organization of databases to keep operational information current.

EDUCATION

Advanced Technician in Software Development, Instituto de Formación Técnica Superior 11 (IFTS 11) — Graduated (November 2025).

Bachelor's in Data Science, Universidad de la Ciudad de Buenos Aires — (2026 – 2027).

SKILLS AND LANGUAGES

Backend & APIs	Python · NestJS · Node.js · TypeScript · Redis · REST APIs · C#
Frontend & Mobile	Angular · React · React Native · Expo
Data & databases	Power BI · SQL · PostgreSQL · MongoDB · Data Modeling · ETL · Python (Pandas)
Cloud & DevOps	AWS · Docker · Git
AI Engineering	Cursor · Copilot · OpenCode · LLM integration · Multi-agent architectures · SDD · n8n · Agentic Workflows · Tool Calling · MCP · LLM APIs · AI Automation · RDD · Harness · Engram · GGA
Working methods	Scrum (Agile) · Kanban
Management tools	Jira · Notion · Trello · ClickUp · Microsoft To-Do · Microsoft Office
Languages	English — Intermediate
